Other Info: Founded in 1621 as a physicke (physic) garden for the teaching of herbal medicine, Oxford Botanic Garden was planted during the 1640s by its first keeper, Jacob Bobart the Elder. In 1648, Bobart created a catalogue of all the plants which he grew, now preserved as a treasured ancient manuscript at the Garden. TOAD is the only distiller in the world allowed access to the catalogue and Garden to both inspire and flavour its recipes.
