Other Info: Growers are encouraged to cultivate their vines with maximum respect for the natural environment and to safeguard biodiversity. The Cantina and its members have also been able to work together to identify sites suitable for single vineyard wines and to produce special selections and even individual cru wines. Experience gained over many years has allowed us to use our winemaking skills to develop a range of various Amarone, Reciotos and Valpolicellas. Historically the winery has also worked hand in hand with growers in other famous viticultural zones near Verona, which allows the Cantina to offer other high quality wines

such as Soave, Bianco di Custoza and Bardolino.

Cantina di Negrar practice sustainable viticulture. They were awarded the Italian Good Wine Guide's 'Ecofriendly Business Award' in 2014 for their commitment to sustainable wine and grape industry projects.
